

Your Personalized **Travel Companion**

Team Composition:

2 Senior Engineers, 1 Tech Lead, 1 Project Manager, 1 Mobile Engineer, 1 QA Engineer

Project Duration:

6 months
(fixed scope)

Tech Stack:

Nest.JS, Next.JS

Project Overview

DestiDime is a smart booking and travel planning platform offering **tailored itineraries, curated weekend getaways, and efficient time management**—making exploration seamless for both locals and travelers.

Business Challenges

- Designing an intuitive, high-performance UI across all devices.
- **Building the platform from scratch** with scalability and compliance.
- **Integrating real-time third-party services** for bookings and updates.
- **Supporting multilingual content** for global accessibility.

Solutions Delivered

- **Conducted user research** and usability testing to guide design.
- **Built a responsive, clean interface** through iterative feedback loops.
- **Developed a modular, scalable architecture** for easy feature integration.
- **Employed agile methodologies** for efficient development and QA.
- **Integrated robust third-party APIs** for real-time travel updates.

Results & Impact

- Unified booking and trip planning platform with **seamless UX**.
- **95% content accuracy** through reliable integrations and partnerships.
- **40% faster load times** and optimized platform performance.
- **Multilingual interface launched**, anticipating **100% user growth**.
- Scalable, future-ready infrastructure **ready for expansion**.
