

FCN Is The Emergent Brand In The Capital Allocation Process

Team Composition:

2 Senior Engineers, 1
Frontend Engineer, 1
QA Engineer, 1 Engineering
Lead, 1 Project Manager

Project Duration:

7 months (fixed scope)
& 1.5 Years support phase

Tech Stack:

TypeScript,
React Js, .NET

Project Overview

FCN revolutionizes **alternative capital allocation and investor relations** by connecting institutional investors with quality alternative funds. The comprehensive platform includes **HedgeFund, Allocator, and Admin Portals**, delivering performance tracking, MSCI risk transparency, and branded media content for enhanced communication.

Business Challenges

- FCN wanted a **centralized platform for Allocators and investment** on Hedge funds.
- There was a need for **strict data privacy**.
- There was no platform integrated for **financial data provisioning (MSCI)**

Solutions Delivered

- A **centralized system** was proposed where allocators and Hedge funds can view **MSCI-verified performance details and invest**.
- **Integration of MSCI** for financial data provisioning using APIs and FTP files importing.
- **Secure FTP(SFTP)** to ensure that data is encrypted during transit.

Results & Impact

- **230 Allocators and 15 Hedge Funds Onboarded** in 2 Years
- **17 Active Funds** Integrated with MSCI
- **90%** of Funds Providing MSCI Risk Transparency Reports
- **50%** Reduction in Administrative Task Time
- **30% Decrease in Data Entry Errors** with Automated Sync

Conclusion

- Techverx empowered FCN with a **secure, centralized platform** that streamlined investor relations and enhanced capital allocation by integrating MSCI data.
